**CUSCO** : In Quechua, Cusco means ‘navel of the world’, since it was the capital of the Inca empire and the starting point of an extraordinary network of 23,000 KM of roads and communications of Inca territory. The city was considered so sacred that if two men of equal rank met along the road, the one who was on his way to the city would pay homage to the other coming the opposite way for the sole reason that he had already been in Cusco. Its unique architecture, in which European styles contrast with the solid and grand Inca foundations, heightens the beauty of a city which harbors a dazzling past and which, despite the strong Spanish influence, still maintains an undeniably Andean atmosphere. One can guess the stories that lie under the earth and stones turned by time and man, and one can feel the force of the area
